

# CashXChain

The most efficient Bridge to global Payment

Faster than banks. Safer than crypto. Simpler than ever.

## Problem & Opportunity

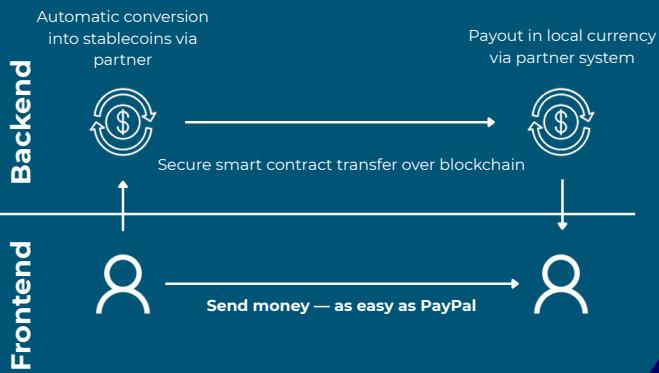

Cross-border **payments are broken**

- SMEs pay **5–7% fees** and **wait days** for settlement
- \$20B+ lost every year to outdated rails
- Blockchain efficiency exists – but **too complex & hard to adopt**

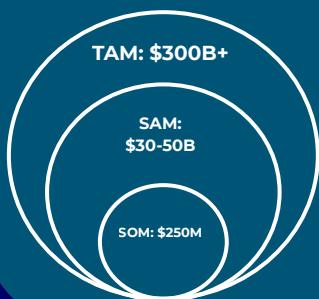

## Solution & Techology

- PayPal-simple UI/UX** – Blockchain fully hidden
- Transactions **in seconds, not days**
- Fee cuts **from 5–7% → <1%**
- Stablecoins + Smart Contracts + API First Design

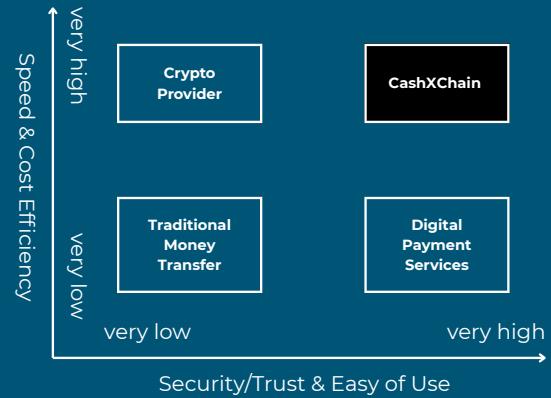

## Market & Business Model

Massive global market – **scalable, disruptive**

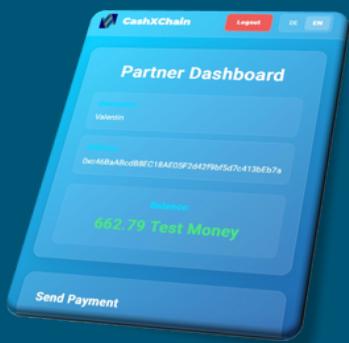

- ~ 0.5–1% per transaction
- FX spread** margin
- Subscriptions** for B2B partners

## Competition & USP

## Traction & Validation

- IP protection (DBGM)** officially granted by the German Patent Office
- Multiple LOIs signed & strategic partnerships** in place → proof of real Market demand
- First Public Prototype live: [app.cashxchain.com](http://app.cashxchain.com)

## Roadmap & Vision

- 2025: First paying Customers, product & regulatory setup
- 2026: Scale transaction volume, expand into new markets
- Future: Universal payment Infrastructure – B2B, B2C, P2P, cross-border, local & online Payments
